

PRIYANKA PAKHALE

Senior Full Stack Developer

✉ pakhalepriyanka0304@gmail.com | ☎ +91 8591284096 | 📍 Mumbai, India

Result-driven Senior Full Stack Developer with **7+ years** of experience building scalable, high-performance web and mobile applications using React, React Native, TypeScript, and modern toolchains. Strong expertise in architecture, CI/CD, TDD, and reusable design systems. Proven ability to lead teams and deliver fast, accessible, and user-centric solutions across healthcare, e-commerce, and BI domains. Seeking to leverage full-stack capabilities and product mindset in a high-impact full stack leadership role

SKILLS

Frontend: React, React Native (Expo), Redux, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Storybook, Accessibility (a11y), React Query

Backend: Node.js, MySQL, MongoDB, Serverless Framework, REST APIs

Testing: Jest, Cypress, TDD

DevOps & Tools: AWS, CI/CD, Git, Monorepo, Webpack, Github Copilot, ChatGPT APIs, Google APIs, Jira, Docker

Other: Agile/Scrum, Design Systems, Performance Optimization

WORK EXPERIENCE

Technogise Pvt Ltd

Senior Technology Consultant

Pune, India

July 2023 – Present

Patient Management & Messaging App (Healthcare – US Client)

- Delivered **100+ features** in React (web) and React Native (mobile) within a shared monorepo, improving dev efficiency by 25%
- Set up and maintained **CI/CD pipelines** for web and mobile apps
- Resolved critical production issues, ensuring high system stability
- Led and mentored **3 junior developers** in best practices and **TDD-based development**
- Supported **10,000+ users** with scalable architecture and reusable business logic packages
- Improved Lighthouse performance scores from **72 to 95+** across web app modules

In-house Notification System

- Architected and built a robust notification system supporting **SMS, email, bulk alerts, on-deck, Slack, and WhatsApp**
- Handled both **frontend** (React) and **backend** (Node.js, Serverless) implementation
- Deployed across **multiple client-facing projects** internally

Feedback Collection App

- Led the frontend development for a feedback management system with **role-based flows** and **notifications**
- Integrated **ChatGPT API** for intelligent rephrasing and sentiment-aware summaries of feedback
- Built admin review dashboards summarizing feedback data by time period with prompt-based analysis
- Used Java for select backend modules and GPT-powered prompts to auto-summarize feedback

Coditas LLC

Senior Software Engineer

Pune, India

February 2021 – May 2023

Fleet Management & E-Commerce App (US Client)

- Built and maintained multiple apps using React, Redux, Node.js, Tailwind CSS, MySQL
- Migrated SCSS/LESS codebase to Tailwind CSS and Storybook-based component libraries
- Introduced React Query and custom hooks to modernize the frontend stack
- Implemented Role-Based Access Control (RBAC), workflows, and geofencing features
- Reduced page load times from **8–10s to under 1s**, cutting **bounce rates by ~30%** and improving SEO rankings

Event Management App

- Built vendor event creation and user registration flows using React + TypeScript

- Led frontend team; managed deployments to dev and prod environments
- Led design discussions and sprint planning

Component Library for Social Media App

- Designed and implemented **100+ Storybook components** using React, Tailwind, and TypeScript
- Integrated APIs and **MixPanel** analytics into reusable components

Zedex Info Pvt Ltd.
Frontend Developer

Mumbai, India
July 2020 – February 2021

Business Intelligence Tool

- Developed a BI platform for data analysts using React, Redux, and CSS Modules
- Implemented performance guidelines and preloading techniques for large datasets
- Reduced Athena query response loading time significantly

E-Commerce App

- Built a marketplace app with listing, chat, and offer features using React and Redux
- Designed token refresh logic using Axios interceptors for seamless authentication
- Supported launch on iOS using React Native

Personal Safety App

- Developed **Android/iOS** alarm app using React native with repeating alarm logic and full-screen alerts
- Used **Redux** for state management and implemented platform-specific behavior

Freelancing
Full Stack Developer

Mumbai, India
March 2018 – March 2020

Online Chess Game

- Developed multiplayer chess game using React, Redux, and Lichess API
- Implemented castling, pawn promotion, en passant, and game status logic
- Added sound effects and visual indicators for check/checkmate

Banking Chatbot

- Built a retrieval-based chatbot using Python and NLP libraries
- Collected and processed real-world banking data for training intent recognition

E-Commerce App (Digital Gadgets)

- Created full-stack e-commerce app with React (frontend), Node.js/MongoDB (backend)
- Implemented admin dashboard, order management, cart flow, and category filters
- Used Redux for state management and wrote test cases to ensure quality

Order Tracking System

- Built order status tracking dashboard with live status updates
- Designed intuitive admin panel to manage tracking features and visibility

EDUCATION

Arizona State University

Completed **18 credits** towards MS in Computer Science

Tempe, USA
2015 - 2017

Vidyalankar Institute of Technology (Mumbai University)

Bachelor of Engineering

Mumbai, India
2011 - 2015
